

Software for TEXTILE BUSINESS MANAGEMENT

Manufacturers, Converters, Merchants, Agents, Textile Distributors. Yarn, Fabric and Apparel Professionals

SOLIN has amassed unrivalled experience within the textile industry. It liberates company dynamics by organising data and making processes more reliable. SOLIN is an international standard database, quickly operational and recognized as the best tool in its class. Each year, it evolves with the help of the user clubs.

■ A PROFESSIONAL DATABASE

to structure the company know-how

■ INTEGRATED FUNCTIONALITY

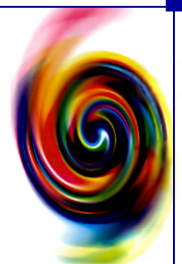

Client relations – Sales – Purchases – Stock – Production
Sub-contracting - Data exchange – Web Services

■ FOR EVERY ACTIVITY SECTOR

Spinning, Throwing, Weaving, Knitting, Finishing,
Complex textile, Home Textile, Apparel, ...

Key Points

- Multi-professional textile solution, multi-companies, multi-sites, multi-language and currencies with variable settings of operating modes
so that the company can adapt to changes
- Items filed by type, multi-referenced with the option of internal and/or external technical informations (cycles, bill of materials)
in order to manage all items whatever the method of manufacture
- Client files with event follow-up, documentation and history
for an efficient sales department response
- Mass, lots, rolls stock, with defects and choice
for better quality control thanks to traceability
- Figures in real time : Offers, Orders, Invoicing, Assets, Outstanding liabilities, Cost price, Profit margins
to run the company serenely
- Assessment of requirements with graphic display and simulations; scheduled logistics and reservations on the scheduled production
to organise and optimise processes
- Production scheduling, graphic planning and production follow-up
to control delivery dates
- Data exchange and web service connectors
to increase productivity throughout the entire logistic chain

Field	Description (non exhaustive, consult us)	Specificities / Activity
TECHNICAL Basic data	<ul style="list-style-type: none"> Multi-level textile items : Fibres, Yarns, Warps, Unbleached Fabric, Finished Fabric, Making, Packs: General and technical features by type, Image, Gencod, Comments, Documentation, free fields settings Various items (non-textile) Alternative Cycle / Bille of materials with speciality by item type Standard cost price with simulations Client and supplier referencing, naming by languages Collection links Machinery – Industrial schedules 	SOLINfil: Spinning - Throwing <ul style="list-style-type: none"> Finite capacity spinning and torsion scheduling (speed linked to torsion), Gantt Planning Packaging parts list: boxes, inserts, cones Level of hygrometry Schedule of runs for yarn dyeing
COMMERCIAL Basic data	<ul style="list-style-type: none"> Clients, suppliers, sub-contractors, carriers, salespeople, representatives, insurance and factoring companies: general and detailed features, Contacts, Comments, Documentation, free fields Delivery, invoicing, credit cover, commissioning settings Contact and event history Control, stoppage, standard text, statistical codes,... 	SOLINtis: Weaving - Knitting <ul style="list-style-type: none"> Finite capacity weaving scheduling: (speed linked to pick / min), Gantt schedule Warp mounting / tying schedule CTC for multi-chain weaving, multi-widths, multi-items Warp and weft pattern description Production Plan Sampling – Robracs FABRIC VISIT option
SALES and CLIENT RELATIONS	<ul style="list-style-type: none"> Client Relation Management (CRM) by file and events settings Tariffs and Price offers Transaction contracts – Orders (flat rate or making-up) and hard copy, fax, e-mail confirmations Control of credit cover Reservations on stock, on outstanding supplies or on production Direct links to scheduled logistics, to the schedules (according to authorisation) Comments, documentation, free fields Order book with values, with search, sorting, remainder to deliver, history Client file with quick access to all information on a single screen Shipping notices with delivery note on paper, fax, e-mail and packaging labels Manual and/or automatic balance of outstanding orders Generation of multi-currency invoices on delivery note or on production (making-up) Paper invoices + fax and/or e-mail – Production of drafts Manual credit notes, or on invoice Management of multi-level payment chasing Management of returns and complaints Statement of Exchange of Goods in connection with IDEP Multi-criteria statistics in quantity and value Commercial margin calculations 	SOLINnob: Finishing – Complex textile <ul style="list-style-type: none"> Infinite capacity scheduling (cycle time, run time or speeds) Central scheduling by histogram Fine scheduling in wait queues by station Operation grouping Dye and dressing receipts management Colour and drug management Management of printing Sampling– Robracs FABRIC VISIT option
PURCHASES	<ul style="list-style-type: none"> Tariffs Stock level control (if required) Requests for supply with grouping Transaction contracts – Supplier orders and confirmations via hard copy, fax, e-mail Multi-criteria tracking status for history and running supplies, with follow-up Receipts in connection with stock and labelling (Bar Codes if required) Registration of invoices linked with supplier delivery notes AWUP calculations (average costs) 	SOLINcop: Confection and Apparel <ul style="list-style-type: none"> Model, size, colour matrixes with parts list/range generator. Supply requests with grouping Management of unpackaged /packaged items Client hierarchy, generated Gencod Order acceptance and matrix logistics with work order and subcontracting orders generator Aided full fashion management
STOCKS	<ul style="list-style-type: none"> Multi-company, multi-sites, multi-stores stocks and location with value Internal and external ownership (making-up) Management of overall quantities, lots, rolls, cut outs with defects and choice Packaging management (boxes, pallets, ...) Automatic and manual movements recorded Consultations and editing with selection and multi-criteria sorting Stock management Traceability of materials, quality and process 	SOLINnet: Converting and Trade <ul style="list-style-type: none"> Manufacturing module in sub-contracting Sourcing – Manufacturer control Sampling– Robracs
PRODUCTION and SUB-CONTRACTING	<ul style="list-style-type: none"> Multi-level net scheduled production requirement calculation Trading logistic: Graphic display of parts lists with scheduled production requirements and collation according to a variable period. Access to details by zooms. Simulations of orders and measure of impact Reservations on loads Management of Manufacturing Orders generically or specifically by sector or activity Sub-contractor orders and allocation of material Production scheduling – Graphical schedules by sectors or activity Workshop documents Manufacturing follow-up – Follow-up and control status Manufacturing receipts in connection with stock and quality control Actual cost price and comparison to standards 	SOLINnet: Converting and Trade <ul style="list-style-type: none"> Manufacturing module in sub-contracting Sourcing – Manufacturer control Sampling– Robracs
