COLLABORATIVE PARTNERSHIP MANAGEMENT

Textile Company networks, Large order providers, Agents, travelling salesmen, e-business clients

log@textil® is a radically innovative solution with easy implementation, that help you to manage networks of many partners and sub-contractors all-over the textile supply chain. It is a major differentiation tool for a decisive competitive advantage and new expansion opportunities.

■ WEB SOFTWARE APPLICATIONS

Commercial B to B Front-Office, Supply chain management, data-exchange transport and control.

■ A COLLABORATIVE PORTAL

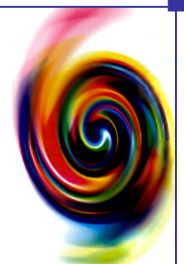

opened to all the authorized users of a homogeneous chain of heterogeneous partners.

■ The SOFTWARE CONNECTORS

to link IT management systems together, to share or exchange data, images, to automate business relationship processes and use web services.

Key points

- Permanent supply chain control tools for all the industrial, logistic and financial aspects, thanks to electronic transactions management
in order to manage an increasing data volume of products, customers and sub-contractors.
- Commercial Front-Office deployed on all the distribution links
in order to develop your sales force.
- Quality, productivity, lead time and price traceability all over the supply chain
in order to make network management more easy and control the suppliers performance.
- Open and compatible system : Service Oriented Architectures (SOA) allows you to activate or deactivate any partner at any moment
in order to keep your enterprise supple and your network upgradable.
- You don't have to change your Enterprise Business Management or ERP
so you can quickly use new collaborative business process models whitout troubles in your home management.
- Reactivity, quality and profit improvements
in order to increase global performance.
